1 Diabetic Foot Care — Why Your Feet Ne...

Diabetes affects your feet in two critical ways: it damages nerves (neuropathy) and reduces blood flow (peripheral vascular disease). Together, these changes mean a small blister, cut, or pressure point

2 Our Comprehensive Diabetic Foot Exam

Every diabetic foot visit at Fallbrook Podiatry includes a systematic evaluation designed to detect problems before they become emergencies.

3 Neuropathy Management — Treating Nerv...

Peripheral neuropathy is the most common complication of diabetes, affecting up to 50% of patients over time. It typically begins in the toes and feet and progresses proximally. While the nerve damage itself

4 Wound Prevention — The Core of Diabet...

Prevention is always better than treatment. Our wound prevention strategy addresses every modifiable risk factor.
