At a glance: Plantar warts (verrucae) are caused by HPV infection in the skin of the sole. They appear as hard, grainy lesions with tiny black dots (thrombosed capillaries) and can be painful with direct pressure. Professional treatment options include cryotherapy, chemical cauterization, and

1 Comprehensive Effective Plantar Warts...

Those pesky plantar warts giving you the runaround? You're not alone. Plantar warts are hard, grainy growths on the bottoms of the feet—often the heel or ball—caused by strains of HPV. They can feel like

2 What Exactly Are Plantar Warts & Why ...

Plantar warts appear on the foot's sole and often look thick and callused with tiny black dots. Because they're in weight-bearing areas, they tend to grow inward and can be tender. They can occur singly or as

3 Plantar Wart Treatment Options

Because warts vary, we tailor care and often combine methods for best results—always aiming to minimize discomfort.

4 What About Home Remedies?

Duct tape occlusion and diligent over-the-counter salicylic acid can help small warts and complement office treatments. However, if you have diabetes, neuropathy, poor circulation, or autoimmune
